

Future Living Survey 2026

Complete user pathways · question counts · time estimates

The survey forks at **Q13** (current living situation): renters take one path, owners take another. Within each branch, conditional follow-ups expand the journey based on prior answers. The tables below enumerate every distinct main pathway (**8 tenant** and **16 owner**) with the total question count and an estimated completion time. Spine modifiers below add questions on top of any path.

Spine modifiers (stack onto any pathway above):

Modifier	Effect
Remote work = Yes (Q14)	+1 Q
Blockchain aware (Q23)	+1 Q
Need market guidance (Q53)	+1 Q
Property value ≥ 200k (Q32, owner)	no change

Time estimates assume an English-fluent respondent answering on mobile, allowing ~6s per radio, ~12s per checkbox group, ~10s per dropdown, ~22s per free-text field, ~30s per paragraph, ~45s per multi-select rank list (max 5), ~5s per 1–10 scale. Ranges show the 85% – 130% corridor around the mean.
